1	This report makes reference to the following documents: D1: EP-A-0 443 292 (DE LA RUE GIORI SA) 28 August 1991 (1991-08-28) D2: US-A-3 627 861 (TIMKE ROBERT F) 14 December 1971 (1971-12-14) D3: US-A-2 872 861 (SMITH JOHN R ET AL) 10 February 1959 (1959-02-10) D4: GB 704 949 A (ENTWISTLE & WALKER LTD) 3 March 1954 (1954-03-03) D5: DE 42 41 210 A (UTSCH KG ERICH) 9 June 1994 (1994-06-09) D6: DE 894 974 C (MESSERSCHMITT BOELKOW BLOHM) 29 October 1953 (1953-10-29) 2 Independent claim 1 2.1 The present application does not meet the requirements of PCT Article 33(1) because the subject matter of claim 1 lacks novelty (PCT Article 33(2)).

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

Document D1 discloses (the references between parentheses refer to that document): a stamping device for stamping characteristic data into plastics products, in which device at least one stamp, comprising a stamping unit with interchangeable characteristic data units, can be guided in the longitudinal direction (*column 4, lines 33-37, figure 1*) in a frame of the device (*column 4, lines 5 and 6*), said stamp, when raised, allowing the introduction and removal, respectively, of the products that are to be stamped and those that have been stamped and when lowered carrying out stamping of the products (*column 8, line 22 - column 9, line 6*).

The subject matter of claim 1 therefore lacks novelty (PCT Article 33(2)).

2.2 The applicant should note that the features of independent claim 1 are also known from documents D2, D3, D4 and D5; see the international search report.

3 Dependent claims 2 - 6, 8

Dependent claims 2 - 6 and 8 do not appear to contain any features which, in combination with the features of any claim to which they refer, meet the PCT requirements for novelty and inventive step. The reasons are as follows:

3.1 The additional features in dependent claims 2

and **3** are known from D1. A stamping device with a heatable stamping unit (see claim **2**) is known from D1 (see column 4, lines 19-32); a stamping device in which the direction for introducing and removing the plastics product runs longitudinally or transversely to the stamping direction of the stamp (see claim **3**) is known from D1 (see column 8, line 22 - column 9, line 6).

The subject matter of claims **2** and **3** thus lacks novelty (PCT Article 33(2)).

- 3.2 The features of claims **4**, **5** and **6** are disclosed in documents D1 and D2; see the international search report. Those features each appear to concern only one of several common procedures from which a person skilled in the art would readily choose in order to form the stamping device.

The subject matter of claims **4**, **5** and **6** therefore appears not to involve an inventive step (PCT Article 33(3)).

- 3.3 The additional features in claim **7** are not known from the available prior art.

The subject matter of claim **7** differs from document D1 in that the stamping device comprises a guide plate, which guides the plastics products.

The design of the stamping device permits precise guiding of the plastics product, thereby

Box No. VII Certain defects in the international application

The following defects in the form or contents of the international application have been noted:

- 1 Contrary to PCT Rule 5.1(a)(ii), the description does not cite documents D1, D2, D3, D4, D5 and D6 or indicate the relevant prior art disclosed therein.
- 2 Independent claim 1 is not drafted in the two-part form pursuant to PCT Rule 6.3(b). However, the two-part form would appear to be appropriate in this case. Consequently, the features known in combination from the prior art (document D1) belong in the preamble (PCT Rule 6.3(b)(i) and the remaining features in the characterising part (PCT Rule 6.3(b)(ii)).

Box No. VIII Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

The applicant should note the following pursuant to PCT Article 6.

- 1 Features which contain wording such as "in particular", "such as containers" and "preferably" (see claim 1) can only be regarded as optional - see the PCT Guidelines, 5.40.
- 2 Heating of the plastics product (see claim 2) is a method feature and cannot be used to delimit the stamping device in relation to the prior art.
- 3 The same applies to claim 8, which contains only method features.
